PROFESSIONAL SUMMARY

Analytical and results-driven Data Analyst and Operations Specialist with over 15 years of cross-functional experience spanning agribusiness supply chains, technical operations, and scientific instruction. Adept at leveraging Python, SQL, and Advanced Excel to engineer automated reporting architectures, build interactive Business Intelligence dashboards, and execute statistical analyses that transform complex datasets into clear, actionable business strategies. Proven track record of optimizing workflow efficiencies, introducing data-backed solutions to minimize financial losses, and translating intricate technical frameworks into practical project implementations.

CORE SKILLS

Technical Data Skills: Python, SQL, Data Cleaning, Exploratory Data Analysis, Statistical Analysis, Power BI, Tableau, Advanced Excel, Pivot Tables, Predictive Modeling.

Operational Expertise: Supply Chain Logistics, Commodity Procurement, Project Management, Revenue Optimization, Strategic Planning, Financial Forecasting.

TECHNICAL PROJECTS

Business Intelligence & Profitability Dashboard | Python Engine | 01/2026 - 06/2026

- Analyzed a transactional dataset of 9,994 retail transactions using Python and Pandas to evaluate cross-regional profitability trends.
- Identified low-performing product lines and critical discount patterns, providing key insights that isolated systemic revenue leakages.
- Engineered 6 fully automated dynamic dashboard charts utilizing Matplotlib and integrated automated reporting suites via OpenPyXL to replace manual compilation workflows.

Automated Academic Result Processing System | Python Engine | 05/2026 - 06/2026

- Designed and deployed a highly flexible Python-based grading engine that programmatically automated cumulative student GPA, TCR, TCE, and TGP metrics.
- Generated clean, formatted Excel-based individual report summaries directly from centralized student records, mitigating spreadsheet data entry errors.
- Reduced administrative manual result computation effort by over 80%, accelerating processing and report turnaround timelines.

PROFESSIONAL EXPERIENCE

Senior Agribusiness Consultant / Operations Specialist | Agribusiness Operations & Trade Group | Abuja, FCT, Nigeria | 01/2009 - 01/2026

- Direct end-to-end regional bulk procurement and distribution logistics for core agricultural commodities including cashew, sesame, and maize, scaling trade volumes by 25%.
- Monitor macroeconomic market pricing indexes and historical trade data pipelines, enabling proactive asset positioning and purchasing optimizations.
- Utilize data analytics workflows to interpret sales throughput and inventory turnovers, introducing layout optimizations that improved margin profitability by 12%.
- Coordinate strict cross-border compliance protocols and customs document workflows, reducing supply chain bottleneck delays by 15%.

Mechanical Technician | Anex Adem Mechanical Workshop | Abocho, Kogi State, Nigeria | 01/2012 - 01/2022

- Executed advanced equipment troubleshooting, preventative maintenance programs, and complex diagnostic faults for a high-volume workshop floor.
- Optimized physical workshop repair lines and asset assignment structures, generating a 20% increase in weekly vehicle and machinery throughput.
- Overhauled tracking logs for tools and spare parts inventories, reducing mechanical diagnostic downtime by 30% across standard operational cycles.

Corps Liaison Officer | National Youth Service Corps (NYSC) - Tarauni LGA | Kano State, Nigeria | 01/2022 - 01/2023

- Served as official administrative liaison and advocate representing approximately 3,000 corps members stationed within the Local Government Area.
- Engineered localized data-entry systems to catalog state attendance, financial records, and community deployment reports, boosting operational reporting compliance to 98%.
- Coordinated communications matrix between executive NYSC zonal management and community stakeholders to efficiently resolve logistical disputes.

Physics Teacher | Federal Government School Kano | Kano State, Nigeria | 01/2022 - 01/2023

- Delivered technical physics curriculum to senior secondary classes, using practical computational modeling examples to contextualize theoretical formulas.
- Tracked student assessment histories using customized tracking sheets, enabling structured target-interventions that increased average final exam score performance by 14%.

EDUCATION

Bachelor of Science (B.Sc.) in Physics — First Class Honors | Kogi State University | Anyigba, Kogi State, Nigeria | 2017/2018 - 2021/2022
